

Keith Rowley
Solar Electric Systems & Products, Inc.

Just a note to let you know how pleased we are with our solar system that you installed in 2009.

Our first electric bill reflecting the use of the solar system was in August 2009. Our August bill for 2008 was \$360.72 while the bill the same period in 2009 was \$201.65. We have seen similar savings since the system was installed. In May of 2010 we had accumulated a credit of \$92.12 reflecting the Total Net usage for the previous year. For May, June, July, and August of this year we have not had to pay anything toward our electrical usage as we have been using up the credits we had earned. For our two story 2620 Square foot home with a pool, I think this is great savings.

As you can guess we are very pleased with our system.

It was a big step for us to install the solar system. We had talked to several companies about solar and I had done research on the WEB concerning solar. After talking to Keith Rowley we felt very confident that installing solar was what we should do. Keith was able to explain the various Utility Company rebates being offered and the tax advantages we could receive. Keith was also very knowledgeable about the solar installation and operation. He was an engineer and not just a salesman. This gave us confidence in our decision.

I would (and have) recommend Solar Electric Systems & Products to anyone considering a solar photovoltaic system. Their system knowledge, design, installation and customer support are all exceptional.
